HAZARDOUS DECOMPOSITION PRODUCTS: None recognized.									
	SECTION 11: TOXICOLOGICAL								
EYE CONTACT: Direct contact may result in severe irritation and possible chemical burns.									
SKIN CONTACT: May cause moderate skin irritation. Prolonged contact may result in chemical burns. Prolonged/repeated contact may cause									
sensitization reactions in susceptible individuals.									
INHALATION: Exposure may cause moderate irritation of the nose, throat, respiratory tract, and other mucous membranes. Inhalation of									
silica dust may result in lung disease (Sili	cosis).								
INGESTION: May cause mild to moderate irritation of the digestive tract. May cause stomach upset and vomiting.									
SIGNS AND SYMPTOMS: Symptoms of eye exposure include pain, burning, redness, and swelling. Symptoms of skin irritation include redness,									
burning, swelling, and rash. Symptoms of respiratory irritation include runny nose, shortness of breath, chest discomfort, and reduced lung									
function. Symptoms of gastrointestinal exposure include abdominal pain, nausea, and vomiting.									
AGGRAVATED MEDICAL CONDITIONS: P	re-existing skin, eye, and respiratory disor	ders may be aggravated by exposure to this product.
